

IES Communications Division Expands Data Center Service Capabilities

Increases presence near Fortune 500 customer base

HOUSTON, April 30, 2012 /PRNewswire/ -- Integrated Electrical Services, Inc. (NASDAQ: IESC) announced that it has expanded its data center service capabilities. The IES Communications Division, based in Tempe, Arizona, has expanded its physical infrastructure expertise to the Southeastern part of the United States. With data center installations for some of the top U.S. companies, IES has opened a Hillsborough, North Carolina office to support the data center market.

"Our leading financial and information technology customers have data centers in the Southeast. This office enables us to enhance our onsite presence with these long-term and expanding customers," said Don Fishstein, President of IES Communications.

IES offers data center design and installation, as well as materials warehouse and pre-fabrication for data centers. The new office supports recent large IES data center projects for customers located in Greensboro, Maiden and Kings Mountain, North Carolina and Boydton, Virginia. The new office houses data center design and installation personnel and functions as a materials warehouse and pre-fabrication facility for the surrounding data center installations.

Integrated Electrical Services, Inc. is a leading national provider of electrical infrastructure services to the communications, commercial, industrial and residential markets. Our 2,300 employees serve clients throughout the United States. For more information about IES, please visit www.ies-co.com.
