IES Communications Division Expands in Northern California

Latest Expansion Supports Recent Data Center Projects for Silicon Valley Customers

HOUSTON, June 14, 2012 /PRNewswire/ -- Integrated Electrical Services, Inc. (NASDAQ: IESC) announced that it has further expanded its data center technology infrastructure service capabilities. The IES Communications Division, based in Tempe, Arizona, has expanded its physical infrastructure and expertise to Silicon Valley in northern California. With data center and other mission critical projects for some of the leading U.S. companies in the region, IES has opened a Santa Clara, California office to support recent large IES data center projects for customers in Silicon Valley as well as the overall growing data center market.

The new Santa Clara office accommodates data center design engineers and project management and site service personnel, and it also functions as a material warehouse and pre-fabrication facility. IES Communications also boasts a full offering of related technology services including networking hardware design and installation, rack/stack and lights-out support services, security/surveillance, and audio/visual systems.

Integrated Electrical Services, Inc. is a leading national provider of electrical infrastructure services to the communications, commercial, industrial and residential markets. Our 2,400 employees serve clients throughout the United States. For more information about IES, please visit www.ies-co.com.
